PLANNING AND DEVELOPMENT ACTS 2000 TO 2009
NOTICE OF SPECIFIED ALTERATIONS TO THE PIPELINE ROUTE AND FURTHER INFORMATION SUBMITTED IN RELATION TO A DIRECT PLANNING APPLICATION TO AN BORD PLEANÁLA IN RESPECT OF THE CORRIB ONSHORE GAS PIPELINE, A STRATEGIC INFRASTRUCTURE DEVELOPMENT
AN BORD PLEANÁLA REFERENCE NUMBERS: 16.GA0004 & 16.DA0005
MAYO COUNTY COUNCIL.

In accordance with Section 182C of the Planning and Development Act, 2000 as amended by the Planning and Development (Strategic Infrastructure) Act, 2006, SHELL E & P IRELAND LIMITED ("SEPIL") (on behalf of SEPIL, Statoil Exploration (Ireland) Limited and Vermilion Energy Ireland Limited) made an application to An Bord Pleanála on the 12th February, 2009 in relation to the proposed construction of the Corrib Onshore Pipeline, Co. Mayo, comprising strategic upstream gas pipeline infrastructure. The altered pipeline extends from the High Water Mark to the landfall at Glengad townland County Mayo in a route under Sruwaddacon Bay to Aghoos townland and to Bellagelly South townland, and into the Bellanaboy Bridge Gas Terminal. Alterations, further information and a revised Environmental Impact Statement (EIS) were lodged with An Bord Pleanála on the 31st May, 2010 on foot of a notice and request for specified alterations issued by the Board on 2nd November, 2009 under Section 182C(5) of the Planning and Development Act, 2000, as amended. These specified alterations and further information together with the original planning application documentation including the revised EIS, may be inspected free of charge or purchased on payment of a specified fee during public opening hours for a period of 4 weeks commencing on Wednesday 30th June, 2010 at the following locations:

- The Offices of An Bord Pleanála, 64 Marlborough Street, Dublin 1
- The Offices of Mayo County Council, Aras an Chontae, Castlebar, Co. Mayo
- The Offices of Mayo County Council, Church Road, Belmullet, Co. Mayo
- SEPIL Local Office, 4 Udarás Na Gaeltachta, Belmullet, Co. Mayo

The documentation may also be viewed/downloaded on the following website:
www.corribgaspipelineABPapplication.ie

Full details of the alterations are also provided within the revised EIS and the book of Further Information drawings.

1. The nature of the specified alterations is indicated below (All placenames referred to are located in County Mayo save for Sruwaddacon Bay which is partly in County Mayo and partly in the foreshore):

- Modified pipeline route, to be beneath Sruwaddacon Bay (and approaches to same) between chainages 83+910 and 89+550 (per pipeline chainages in 2009 application) (Glengad and Aghoos).
- A further significant increase in separation distance between the proposed pipeline to the nearest occupied residence.
- The proposed pipeline is now reduced in length by 0.9 km to approximately 8.3km long.
- The altered route under Sruwaddacon Bay, (and the approaches to same) of approximately 4.9km will include the placing of the pipeline within a 4.2m (outside diameter) tunnel, constructed from Aghoos to Glengad.
- Approximately 4.6km of the tunnel will be beneath Sruwaddacon Bay.
- A Maximum Allowable Operating Pressure (MAOP) in the Onshore Pipeline (between the Landfall Valve Installation (LVI) and the Bellanaboy Bridge Gas Terminal) of 100 barg.
- An MAOP in the Offshore Pipeline (upstream of, and including, the LVI) of 150 barg.
- The proposed pipeline is no longer located within Priority Habitat in the Glenamoy Bog Complex (cSAC).
- The tunnel will be constructed in one direction from Aghoos and the pipeline will be assembled and installed into the tunnel from Aghoos; as a result the tunnelling compound at Aghoos will be larger and will see an increased volume of activity while the tunnelling compound at Glengad will see a decreased level of activity, and there will be no construction activity at Rossport.
- The section of pipeline from chainage 83+400 to the High Water Mark at Glengad has been included within the development application.

Ancillary changes to the development arising out of the specified alterations are also included. These include: a spare umbilical, electrical cable, fibre optic cable and water discharge pipeline within the tunnel, increased width of the stone road by 3m to 12m, increased importation of material to the Aghoos tunnelling compound, increased volume of excavated material (approximately 68,000m³) and a longer duration of construction works.

2. Further Information has been furnished to The Board. The further information can be summarised under the following topics:

- A revised EIS detailing the revised construction methodology and pipeline route alignment and resulting impacts;
- Appendix Q of the revised EIS provides an integrated set of design documentation which presents a complete, transparent and adequate demonstration that the pipeline does not pose an unacceptable risk to the public;
- A Natura Impact Statement to support the Appropriate Assessment of the altered scheme;
- Details of construction of the pipeline in peat and measures to mitigate peat instability; and
- Revised drawings which fully describe the full extent of the proposed onshore pipeline.

A new compulsory acquisition order has been submitted to An Bord Pleanála to incorporate the specified alterations/modifications. This compulsory acquisition order is available for inspection at the locations specified above and also at Belmullet Garda Station, Belmullet, Co Mayo.

Submissions or observations in relation to the **SPECIFIED ALTERATIONS AND FURTHER INFORMATION ONLY** may be made solely to An Bord Pleanála (The Board), 64 Marlborough Street, Dublin 1 during the above-mentioned four weeks.

Any submissions/observations must be accompanied by a fee of €50 (except for certain prescribed bodies). There is no fee required to make a submission in relation to those parties/individuals who have already made a valid written submission to the Board regarding the application.

Submissions or observations must be received by the Board not later than Wednesday 28th July, 2010. Such submissions/observations must also include the following information:

NOTICE
GAS ACT 1976 AS AMENDED
APPLICATION TO THE MINISTER FOR COMMUNICATIONS, ENERGY AND NATURAL RESOURCES BY SHELL E&P IRELAND LIMITED UNDER SECTION 40 OF THE GAS ACT AS AMENDED FOR CONSENT TO CONSTRUCT A NATURAL GAS PIPELINE FROM CORRIB GAS FIELD SUBSEA FACILITIES TO BELLANABOY BRIDGE GAS TERMINAL, BELLAGELLY SOUTH, COUNTY MAYO

Notice is hereby given that Shell E&P Ireland Limited ("SEPIL") (on behalf of SEPIL, Statoil Exploration (Ireland) Limited and Vermilion Energy Ireland Limited) has made an application under Section 40 of the above Act to the Minister for Communications, Energy and Natural Resources for consent to construct a natural gas pipeline from the Corrib Gas Field subsea facilities to the gas terminal at Bellanaboy Bridge, Bellagelly South, County Mayo.

The proposed gas pipeline is approximately 91.7km in length and 508mm in diameter and will follow an offshore route from the Corrib Gas Field to a landfall at Glengad (Dooncarton) in Broadhaven Bay, County Mayo. This proposed modification of the onshore element of the pipeline route will extend from the landfall of the offshore pipeline to Bellanaboy Bridge Gas Terminal. The onshore pipeline route traverses the headland at Glengad, from there the route traverses Sruwaddacon Bay in a south-easterly direction to Aghoos, and then in an easterly direction across an area of peatland and forestry, before turning in a southerly direction and joining the previously approved route at Bellagelly before entering the Bellanaboy Bridge terminal site.

The offshore section is approximately 83.4km in length, and the proposed onshore section is approximately 8.3km long, extending from the landfall to the terminal.

The proposed pipeline system is comprised of the gas pipeline itself, an associated 130 mm nominal diameter services umbilical, extending between the Corrib Gas Field and the landfall, and 3 no. smaller diameter umbilicals and other essential cabling extending from the landfall to the Terminal, as well as a 250 mm diameter outfall discharge pipeline from the Terminal to a point approximately 12.7km from the Landfall outside Broadhaven Bay. The proposed development also includes an above-ground Landfall Valve Installation, comprising of valves and instrumentation located in the townland of Glengad (or Dooncarton). This installation is designed to limit pressure in the onshore pipeline to 100 bar or less.

Written submissions or observations with regard to the said proposed application may be made in writing to the Minister for Communications, Energy and Natural Resources, Petroleum Affairs Division, 29-31 Adelaide Road, Dublin 2 for a period of one month starting 30th June 2010 until 30th July 2010 both dates inclusive.

ENVIRONMENTAL IMPACT STATEMENT IN COMPLIANCE WITH SECTION 13A OF THE PETROLEUM AND OTHER MINERALS DEVELOPMENT ACT 1960 (AS AMENDED)

Notice is hereby given that Shell E&P Ireland Limited ("SEPIL") (on behalf of SEPIL, Statoil Exploration (Ireland) Limited and Vermilion Energy Ireland Limited) has made an application to the Minister for Communications, Energy and Natural Resources for approval of the working of petroleum consisting of revisions to the approved Plan of Development for the Corrib Gas Field Development Project.

The revisions relate to the proposed construction of a landfall valve installation at Glengad, County Mayo and a proposed modification of the onshore element of the Corrib pipeline route. This proposed modification of the onshore element of the pipeline route will extend from the landfall of the offshore pipeline to Bellanaboy Bridge Gas Terminal. The onshore pipeline route traverses the headland at Glengad, from there the route traverses Sruwaddacon Bay in a south-easterly direction to Aghoos, and then in an easterly direction across an area of peatland and forestry, before turning in a southerly direction and joining the previously approved route at Bellagelly before entering the Bellanaboy Bridge terminal site. The revision also includes the use of spare cores in the services umbilical to discharge treated produced water at the subsea manifold located at the Corrib gas field.

Seeing IS **believing**

The Western People has always been ahead of all competitors - including local radio - when it comes to effective advertising across the Recruitment, Property and Classified sectors.
Advertising experts* say that radio is a background medium and there is a widespread tendency for people to scan other radio stations during the commercial break, whereas people buy a newspaper to seek out information.
